**Re: Remedco Regional Treatment Center - Solid Waste Treatment Site Permit
Determination of Non-Significance**

Dear Cullen:

The Seattle-King County Department of Public Health has proposed a determination of non-significance, as required by the State Environmental Protection Act, for a solid waste treatment site located at 7201 East Marginal Way South, Seattle, WA 98108. Remedco will thermally treat petroleum contaminated soils. Oily wastewater will also be processed in an Oil Trap Wastewater Treatment System. The treated water will be used to rehydrate treated soils. The Puget Sound Air Pollution Control Agency will issue a Notice of Construction for the thermal desorption unit. Soils that designate as hazardous or dangerous waste will not be accepted. The Determination of Non-Significance and the SEPA checklist are attached.

All comments or appeals must be received by February 25, 1997. You may inquire about the proposal by contacting Jill Trohimovich at 296-4831.

Sincerely,

Jill Trohimovich, Sr. Environmental Health Specialist
